

# Build your own Claude the Crab!

Ask an adult to help you and use scissors to cut out Claude's eyes and legs. Cut your paper plate in half and paint or colour it orange.

Glue the legs and eyes in position as shown below. Add Claude's cheeks and smile with paint or colouring pencils. Cut out the two strips at the bottom of this sheet. Glue side 1 onto the back of the paper plate on opposite ends. Glue side 2 on the front side of the paper plate to create a loop big enough to fit your hands through.
